## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: The above claims, as represented by the independent claims 1, 13, and 18; are allowed because the prior art of record fails to disclose the claimed combinations which include a bus switch chip and IC circuit with a gate-isolation circuit that improves ESD protection from a first pin to a second pin in which the bus switch can add isolation from one pin to the other by coupling an ESD voltage to a coupling circuit to ground the gate of the bus switch to turn it off.

The closest prior art of record is Kwong (US PN 6118640), which discloses an ESD shunt switch between power supply busses that is actively enabled and disabled by a control circuit, which can cause the ESD switch to turn on from an applied ESD pulse during a powered down condition; thus shunting the ESD pulse to the other power supply.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
